This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

SECOND SESSION, FORTY-THIRD CONGRESS.

ANNUAL REPORT

OF THE

HIEF OF THE BUREAU OF STATISTICS

ON THE

COMMERCE AND NAVIGATION

OF

THE UNITED STATES

FOR

THE FISCAL YEAR ENDED JUNE 30, 1874.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1875.

TREASURY DEPARTMENT, BUREAU OF STATISTICS,
October , 1874.

SIR: I have the honor to transmit herewith my annual report and the complete statements in detail of the commerce, immigration, and navigation of the country for the fiscal year ended June 30, 1874, compiled in this Office from the returns of the several collectors of customs, in accordance with the acts of February, 10, 1820, and July 28, 1866.

Very respectfully, your obedient servant,

EDWARD YOUNG,
Chief of Bureau.

Hon. B. H. BRISTOW,
Secretary of the Treasury.

CONTENTS.

PART I.—COMMERCE.

Table.		Page.

16.	Iron tonnage of steam-vessels of the United States	1044–1046
17, 18.	Balance-sheets of tonnage-accounts	1047, 1048
19.	Recapitulation of the tonnage of the United States	1049
20.	Description of the tonnage of the United States	1049
21.	Vessels built in the States and Territories from 1815 to 1874	1050
22.	Registered and enrolled tonnage of the United States from 1789 to 1874, and how employed	1051–1053
23.	Distribution of tonnage from 1789 to 1874	1054–1056
24.	Statement of tonnage of vessels sold to foreigners from 1821 to 1874	1057
25.	Condensed statement of registered, enrolled, and licensed vessels of the United States	1058
26.	Condensed statement of sailing-vessels, steam-vessels, canal-boats, and barges of the United States	1059, 1060

ERRATUM.

On page 628, instead of 301,956,179 pounds of coffee, read 401,956,179 pounds.

ERRONEOUS CLASSIFICATION.

WOOLS.—The figures on pages 581, 595, 684, and 685, while they correctly exhibit the *aggregate* of classes 1 and 2, are found to be inaccurate in classification; "Combing Wools" (class 2) being too large, and "Clothing Wools" (class 1) consequently too small. The rates of duty being the same, importers are not careful to distinguish in their invoices, "combing" from "clothing" wool, and erroneous classification therefore results.

REPORT

OF THE

CHIEF OF THE BUREAU OF STATISTICS

TREASURY DEPARTMENT,
Bureau of Statistics, November 4, 1874.

SIR: The Chief of the Bureau of Statistics has the honor to submit the following report of its operations during the fiscal year ended June 30, 1874.

WORK OF THE BUREAU.

The work performed in the Bureau is of such a peculiar and varied character as to render a tabular statement impossible. The following notice of the several divisions and subdivisions of the Bureau, with a brief statement of the nature of the labor assigned to each, exhibits but imperfectly the extent, variety, and difficulty of the work annually performed.

The chief clerk is Mr. E. B. Elliott, who is also a member of the Civil-Service Commission.

DIVISION OF EXAMINATION—J. N. WHITNEY, CHIEF.

Number of clerks: Males, 4; female, 1.

In this division, the monthly and quarterly statements of commerce, navigation, immigration, &c., rendered to the Bureau by the collectors of customs, are carefully and intelligently examined previously to being recorded by the clerks in the division of compilation. These examinations disclose errors, large in number and grave in character, which, if not eliminated from the statements before they are compiled and published, would, in many instances, serve but to mislead. In some published trade-statements of foreign countries, and of this country prior to the establishment of the Bureau, important errors appear. The following entry, copied from a statement of the imports from Canada, which appears in the Annual Report of Commerce and Navigation for the fiscal year ended June 30, 1865, will serve as an illustration:

District.	Article.	Cwt.	Dollars.
Oswego, N. Y.	Wheat-flour	4,369,331	194,676

One unfamiliar with the prices of breadstuffs at that period would suppose, from the above figures, that wheat-flour cost in Canada but 4½ cents per cwt., or about 8 cents for the 196 pounds contained in a barrel. The critical examination to which every custom-house return is now subjected by the examining-clerks in this division renders such an error impossible.

Of the amount and character of the labor involved in the examination of the returns from collectors of customs, the following statement affords but an inadequate idea:

Number of pages of correspondence written	3,380
Acknowledgments of letters written	1,702
Acknowledgments of statements written	4,076
Calls for statements written	413
Statements examined	16,140

In addition to the above, a large amount of miscellaneous work is performed, such as the compilation of tables, preparation of blanks, books of record, &c.

COMPILATION—THOMAS CLEAR, CHIEF.

Whole number of clerks: 13 males and 2 females.

Included in this division are sections, or subdivisions, in which are compiled the statistics of home-consumption, of indirect and in-transitu trade, and of merchandise warehoused and withdrawn from warehouse. It is impossible to submit any exhibit that will give an adequate idea of the extent of patient, careful, and accurate labor performed by the clerks employed in compiling the statistics of our foreign trade and in preparing statements in response to calls for information.

IMMIGRATION AND NAVIGATION.—L. F. WARD, CHIEF.

Number of clerks: 5 males and 1 female.

The statistics of navigation have been rendered more complete and valuable during the past year by the distinction made, for the first time, in their compilation between entrances and clearances with cargoes and in ballast; and their preparation and publication in this form have necessarily increased the labor devolving upon this division.

Satisfactory progress has been made during the year in the work of perfecting the returns of immigration, and rendering these important statistics more complete and accurate in their details as to nationality, age, sex, and occupation; in all of which there has been, of late, an earnest and increasing interest, especially on the part of those who consider them with reference to their economic and political significance.

NUMBERING OF VESSELS, TONNAGE, ETC.—J. B. PARKER, CHIEF.

Number of clerks: 4 males and 1 female.

The work in this division consists of the assignment of official numbers and signal letters, filling up and forwarding notices of awards, which alone requires a large amount of careful research and labor, as, also, the keeping of the permanent registers pertaining to these awards; the compilation, copying, and proof-reading of the regular "Annual List of Merchant Vessels," the various annual, monthly, weekly, and miscellaneous statements which are called for by members of Congress and others in relation to the merchant-marine of the country; and the careful examination of the annual and quarterly reports, the results of which are embodied in theregular annual reports issued by the Bureau.

During the last fiscal year the vessels numbered and registered in this division were as follows:

	No.	Tonnage.
Sailing-vessels	1,084	237,616.18
Steam-vessels	380	101,178.44
Unrigged vessels	546	71,209.54
Total	2,010	410,004.16

A statement showing the number of vessels and amount of tonnage belonging to the different customs-districts of the United States on the 30th of June, 1874, geographically classified, is appended to this report, (marked A,) and attention invited to the note in reference to unrigged vessels.

LIBRARY.—E. T. PETERS, LIBRARIAN.

One female assistant.

The large demand upon the Bureau by members of Congress and others for statistical information, on a great variety of subjects, gives increasing importance to the work of this division, which includes the duty of keeping on the watch for all new statistical publications, especially in relation to commerce, industry, and finance; the classification and arrangement of the books and papers received, and placing them at the service of the officers of the Bureau and others entitled to their use; the indexing and systematic filing of all newspapers and periodicals received; and a variety of other duties. The important relation of the library to the ability of the Bureau to respond with promptness to the numerous and varied calls for information made by public men, renders it a matter of regret that the reduction of the clerical force, elsewhere referred to, has frequently compelled the undersigned to devolve upon the librarian and his assistant other duties than those that especially pertain to the work of the division.

MISCELLANEOUS.

There are other departments of labor which, although not classed with the larger divisions, are yet of much importance, requiring as they do careful, patient, and intelligent industry. These are as follows: Publication, in charge of James Ryan; property, pay, and miscellaneous, of J. D. O'Connell; translation, A. W. Angerer; and revision, R. A. McMurray; the two first-named being assisted by one male and one female clerk.

The mails are in charge of a female clerk, upon whom the abolition of the franking-privilege has imposed much additional labor.

CLERICAL FORCE.

At the close of the last fiscal year, the number of clerks whose respective duties are above indicated consisted of 32 males and 8 females. At the present time, however, the force consists of only 28 male and 8 female clerks.

REDUCTION OF THE CLERICAL FORCE.

Section 13 of the act of July 28, 1866, provided for the detail and appointment of such clerks as might be necessary to fully carry out the provisions of the act establishing the Bureau, without any limitation as to their number or classification. For the first three months, the number of clerks averaged about 42, increasing to 49 in the year 1867, and to 54 in 1868, in which latter year the monthly pay-roll for the officers,

clerks, and six messengers and laborers averaged $6,502. In March, 1869, a reduction in the clerical force was commenced, which continued during the year until the number of employés was reduced from an average of 61 in the first quarter to 52 in the last quarter of that year and to 49 in January, 1870. From this date, the number employed was still further reduced; the reduction continuing throughout the 53 months ended June 30, 1874, during which period, although the work of the Bureau gradually increased, the number of employés averaged but 45½, or about 8 less than during the previous 40 months, while the monthly pay-roll showed a reduction from $5,947.88 in the earlier period to $5,307.19 in the later; a saving of $640.69 per month, or $33,956 during the time in which the Bureau has been under the direction of the undersigned.

And when, under the act of July 12, 1870, it became necessary to submit to Congress an estimate of the number of clerks and other employés required in the Bureau, no request was made for an increase of force to provide for the gradual increase of work incident to the growth of the country, and to that growing interest in economic questions which manifests itself in an enlarged demand for the publication of commercial, industrial, and financial statistics, and in a constantly increasing number of applications for such statistics on the part of legislators, economists, business-men, and writers for the press.

The following statement shows, in detail, the number of clerks and other employés, with the average amount of their monthly salaries, including those of the chief officers of the Bureau, from the establishment of the Bureau to June 30, 1874:

Periods.	Males.	Females.	Messengers and laborers.	Total.	Amount.
From October 1, 1866, to December 31, 1866, average	28.33	13.33	(*)	41.66	$4,309 01
Year 1867, average	34.00	14.83	4.00	52.83	5,591 82
Year 1868, average	40.33	13.92	6.08	60.33	6,502 19
From January, 1869, to January, 1870, as follows:					
January	43	13	6	62	6,834 79
February	43	13	6	62	6,204 56
March	43	12	4	59	6,702 97
April	41	10	4	55	5,958 82
May	41	10	4	55	6,142 15
June	43	10	6	59	5,996 10
July	43	10	5	58	5,977 26
August	48	10	3	61	6,614 73
September	45	7	3	55	5,964 62
October	41	7	3	51	5,835 35
November	42	7	3	52	5,615 77
December	44	7	3	54	6,114 68
January	39	7	3	49	5,818 23
Average of 13 months	42.77	9.46	4.08	56.31	6,143 08
From October, 1866, to January, 1870, average of 40 months	38.33	10.27	4.72	53.32	5,947 88
From February, 1870, to June, 1874, average of 53 months	33.28	7.88	4.34	45.50	5,307 19
Monthly decrease under present direction, average	5.05	2.39	0.38	7.82	640 69

* Detailed from Bureaus of the Treasury.

In view of the fact already presented that the increased work of the Bureau had been performed during the past four and a half years with a diminished force, and that owing to this increase of work it became necessary to ask for a detail of several additional clerks during the latter months of the past fiscal year, the announcement that the regular

force was diminished by Congress to the extent of four clerks, while clerks detailed from other offices were no longer to be obtained, occasioned deep regret. This reduction of force must have been recommended by the House Committee on Appropriations, under a misapprehension of facts, as they certainly had no intention to cripple the Bureau, yet it is none the less severe in its operation. Any reduction in the scope of its work, or diminution in the frequency of publication of important commercial statements, is deemed unadvisable, as such a curtailing of the work of the Bureau would necessarily impair its usefulness to the public. Indeed, the demands upon it are steadily in the direction of increased activity, necessitating the cultivation of a more extended field of inquiry.

The hope is, therefore, confidently entertained that a small increase in the present number of clerks will be authorized by Congress at the ensuing session, in order that the progress of the Bureau in the direction of increased efficiency may not be retarded.

PUBLICATIONS OF THE BUREAU.

Monthly Reports of Commerce and Navigation.—The monthly reports of this Bureau have, as heretofore, been regularly published, and 3,000 copies distributed, a few hundred of which are sent to foreign countries. They have been compiled at the earliest date after the receipt and correction of the returns, and, no doubt, have been printed with as much dispatch as the arrangements of the Congressional Printing-Office would permit.

Though not so promptly published as the trade-reports of some European countries, yet, for accuracy of statement, the statistics of commerce and navigation, as issued by this Bureau, may safely challenge comparison with those issued by any other government.

Annual Report of Commerce and Navigation.—The volume for the fiscal year 1873 was compiled and printed at the usual time. The statements for the fiscal year 1874 were compiled and sent to the Congressional Printer at an earlier date than ever before; and there is no doubt that the printed volume will be furnished to members of Congress as early in the session as they will be prepared to consult its pages.

The demand from foreign countries and from commercial bodies and statistical associations for copies of this volume, as well as for the other publications of this Bureau, induces a renewal of the earnest recommendation made in last year's report that an increased number be authorized. Giving, as it does, in detail, our trade with each foreign country, as well as the trade of each customs-district, this annual posseses great value, not only to the statesmen, legislators, and commercial men of this country, and to our ministers and consuls abroad, but to foreign governments, who of late are urgently desirous of an interchange of statistical publications. As the report is not stereotyped, it is desirable that a sufficient number be printed at once to fully supply the home and foreign demand, including the officers of the several customs-districts of the United States.

List of Merchant-Vessels of the United States.—The sixth annual statement of "Vessels Registered, Enrolled, and Licensed under the laws of the United States, designating the class, name, and place of registry," as well as the official number and signal-letters awarded to each vessel, was prepared and 2,000 copies published for distribution to the officers of customs, the masters of vessels engaged in the foreign trade, and the principal ship-owners, as well as to the commanders of United

States war-vessels. The value of this list has been enhanced by the insertion therein of a carefully-prepared "code-list," giving the signal-letters assigned to all sea-going vessels, arranged in their regular alphabetical order, without regard to the initial letter of the names of the vessels. Ship-masters can, by reference to it, obtain the name, tonnage, and home port of any vessel exhibiting her signals at sea. This volume also includes a list of the vessels belonging to the revenue-marine, giving the date and place of building, and the number of the officers and men; also a list of the vessels now belonging to the United States Navy, giving their name, rate, class, guns, tonnage, means of propulsion, and station of each; to which is appended a complete list of the Navy from 1797 to 1874, with the number of line, staff, and other officers.

SPECIAL REPORT ON THE HISTORY OF CUSTOMS-TARIFF LEGISLATION.

One thousand copies of this document, printed by order of Congress, have been received from the Congressional Printer, and distributed to officers of the Treasury Department, including custom-house officials, and to our ministers and consuls abroad. This document was increased in value by the insertion of so much of the Revised Statutes, approved June 22, 1874, as related to the customs-tariff, together with a tabular arrangement of the rates of duty now in force.

SPECIAL REPORT ON IMMIGRATION.

During the past year the distribution of the English edition in the United Kingdom has been continued, while a considerable number of copies of this report in the German and in the French language have been forwarded to the continent of Europe for distribution in the countries where those languages are spoken.

A translation of the above report into the Swedish language was completed during the past fiscal year, and transmitted through you to Congress, with a letter dated June 8, 1874, from which the following extracts are made:

The demand for the translation of the report into the spoken languages of the other countries of Continental Europe, more particularly into the Scandinavian, has been of the most pressing nature, not only from those who desire to emigrate, but from a number of diplomatic and consular officers of the United States, who are impressed with the conviction that great benefit would result if each person wishing to emigrate could read in his own language the information which the report embodies.

The stream of immigration from Scandinavian countries, which previously was inconsiderable, has, during the past five years, been gradually and surely increasing in volume. During the five years from 1869 to 1873, inclusive, the immigrants who arrived from those countries were as follows:

	1869.	1870.	1871.	1872.	1873.	Total.
From Sweden	24,115	12,009	11,659	14,645	11,351	73,779
From Norway	17,718	12,356	11,307	10,348	18,107	69,836
From Denmark	4,282	3,041	2,346	3,758	5,095	18,522
Total	46,115	27,406	25,312	28,751	34,553	162,137

As the climate of the more northern portions of our country is peculiarly suited to those whose birthplace is chiefly north of the Baltic, and as the rich and highly productive soil of our Northwestern States and Territories will yield far larger returns than that of their native pine-clad hills, a greatly-increased immigration from these countries may be looked for in the future if trustworthy information in regard to the advantages possessed by various parts of our country be placed within the reach of those who desire to emigrate.

While it would be invidious to single out from the nationalities of Europe any people who are of more value to this country than another, yet, as the Scandinavians do not congregate in our large cities, where the labor-markets are already over supplied, but usually proceed at once to the sparsely-settled portions of the North and Northwest, where they cultivate the virgin soil, they constitute a valuable addition to our population.

In those portions of Europe where the English, French, and German languages are spoken the report has already been widely distributed; and it is to be believed that the effect of this distribution has been to cause a considerable increase of immigration to this country, especially among the class who are able to bring with them a small capital wherewith to engage in farming or other productive industry on their own account.

In view of this fact, and of the various considerations above presented, it seems not only proper, but eminently desirable, that the same means of information should be placed within the reach of the thrifty inhabitants of the Scandinavian countries.

I have, therefore, caused said report, embracing "Information for imigrants," to be translated into the Swedish language, and now have the honor to transmit through you to Congress the result of this labor, asking that five thousand copies of the translation may be printed for gratuitous distribution in Sweden, Norway, and Denmark.

If the economical value of the immigrant be as great as indicated in the report, viz: $40, then the increment to the material wealth of the country from the Scandinavian immigration of the last five years amounted to nearly one hundred and thirty million dollars, ($129,709,600,) a sum which would compensate *twenty thousand times* for the expenditure necessary to print and distribute a Swedish edition of five thousand copies of the report under consideration.

While the value of the work has been attested by communications from various parts of Europe, as well as by notices of the press, the want of a good map of the United States has been pointed out as a serious defect. It is, therefore, respectfully suggested that such a map, corrected to as late a date as practicable, be ordered; and that, in addition to the five thousand copies thereof required for the Swedish edition of the report, there be printed ten thousand extra copies, to accompany such numbers of the English, French, and German editions as have not yet been distributed.

The recommendations in the foregoing letter for the publication of the report in the Swedish language and of a map of the United States for the several editions are hereby renewed. And, as the English edition of the report is nearly exhausted, it is also recommended that there be printed from the stereotype plates at least three thousand copies for distribution in Great Britain and other English-speaking countries.

DECLINE IN IMMIGRATION.

Immigration, which reached its culminating-point in 1873, suffered a decline in the past fiscal year of 146,464, or from 459,803 to 313,339. This decrease may, however, be regarded as only temporary; the average for the past two years being 386,571, while that of the past seven years is only 360,208; in other words, the immigration for the last two years has been larger than that of any other two consecutive years since the establishment of the Government, with the exception of 1853 and 1854.

Returns for the quarter ended September 30, however, indicate that the decline still continues, the figures showing a considerable falling-off from those in the corresponding period of the preceding year.

This decrease in the arrival of immigrants has been accompanied by a large increase in the number of persons leaving the country; and it is well-known that this increase is chiefly made up of those who have come hither with the intention of remaining.

It is to be regretted that, owing to causes hereinafter mentioned, it has not been possible to secure full statements of the number of steerage-passengers who have departed from the United States. The data which have been obtained show little of interest beyond the total number of emigrants, and only approximately those who leave the port of New York. The departures from the whole country during the past fiscal year were 134,686, as against 119,154 in 1873, and less than 93,000

in each of the years 1872 and 1871, thus indicating that this efflux commenced some time before the flow of 1873 had ceased.

The diminished rate of increase in our foreign population is undoubtedly due to the recent general prostration of business in this country, the stagnation of productive industry, and the consequent diminution of the demand for labor. The extremely low rates of transatlantic passage prevailing during the past year have also contributed to induce a large number of persons of foreign birth to visit their native land with the intention of returning so soon as business resumes its wonted activity. Indeed, of 500 steerage-passengers who left New York in a steamship-line over 100 were known to have returned.

The following comparative statements will exhibit the leading facts connected with immigration for several years past:

TABLE I.—*Comparative statement of immigration and emigration for the seven fiscal years from July* 1, 1867, *to June* 30, 1874, *inclusive.*

	Year ended June 30—							Total.
	1868.	1869.	1870.	1871.	1872.	1873.	1874.	
Total number of passengers arrived in the United States	328, 148	389, 891	436, 785	386, 271	472, 034	520, 885	375, 679	2, 909, 693
Total number of passengers departed from the United States	67, 335	73, 862	81, 886	92, 547	92, 904	119, 154	134, 686	662, 374
Excess of arrivals over departures, or total increase of population by immigration	260, 813	316, 029	354, 899	293, 724	379, 130	401, 731	240, 993	2, 247, 319
Passengers not immigrants:								
Citizens of the United States returning from abroad	40, 060	26, 817	33, 865	43, 662	49, 056	47, 744	47, 730	288, 934
Aliens not intending to remain in the United States	5, 899	10, 306	15, 717	21, 259	18, 172	13, 338	14, 610	99, 301
Total non-immigrants	45, 959	37, 123	49, 582	64, 921	67, 228	61, 082	62, 340	388, 235
Total aliens, *i.e.*, total arrivals less citizens of the United States	288, 088	363, 074	402, 920	342, 609	422, 978	473, 141	327, 949	2, 620, 759
Net immigration	282, 189	352, 768	387, 203	321, 350	404, 806	459, 803	313, 339	2, 521, 458
Net emigration	21, 376	36, 739	32, 304	27, 626	25, 676	58, 072	72, 346	274, 139

TABLE II.—*Comparative statement of immigration for the four fiscal years from July* 1, 1870, *to June* 30, 1874, *showing New York and "all other" districts separately.*

Passengers.	Year ended June 30—				Total.
	1871.	1872.	1873.	1874.	
Total number of passengers arrived in the United States:					
New York	228, 810	311, 735	337, 824	229, 443	1, 107, 812
All other districts	157, 461	160, 299	183, 061	146, 236	647, 057
Passengers not immigrants:					
Citizens of the United States returning from abroad:					
New York	19, 553	24, 828	27, 591	31, 294	103, 266
All other districts	24, 109	24, 228	20, 153	16, 436	84, 926
Aliens not intending to remain in the United States:					
New York	3, 052	3, 681	2, 899	4, 005	13, 637
All other districts	18, 207	14, 491	10, 439	10, 605	53, 742
Total non-immigrants:					
New York	22, 605	28, 509	30, 490	35, 299	116, 903
All other districts	42, 316	38, 719	30, 592	27, 041	138, 668
Net immigration:					
New York	206, 205	283, 226	307, 334	194, 144	990, 909
All other districts	115, 145	121, 580	152, 469	119, 195	508, 389
Aliens:					
New York	209, 257	286, 907	310, 233	198, 149	1, 004, 546
All other districts	133, 352	136, 071	162, 908	129, 800	562, 131

TABLE III.—*Comparative statement of immigration, by countries, ethnologically grouped, for the four fiscal years from July 1, 1870, to June 30, 1874.*

Countries, ethnologically grouped.	Year ended June 30—				Total.

TRADE WITH CANADA.

Although the published statements of the Bureau in regard to the whole foreign trade of the country, and particularly of our exports by water, are nearly accurate, yet it has hitherto been found impracticable, if not impossible, to obtain full returns of merchandise exported to the provinces of Ontario and Quebec. The fact, long known and deplored, is the more to be regretted now, when our commercial relations with the Dominion of Canada excite much discussion, and will soon, no doubt, engage the serious attention of the Senate of the United States. The returns from several custom-houses on the Canadian border are necessarily defective, owing to the want of legislation requiring persons exporting merchandise by land-conveyance to file full manifests of such merchandise and produce with the collector of the customs district on the border, across which the articles pass into the foreign country, as is now required in the case of all exports to foreign countries in vessels.

The act of February 10, 1820, provides that—

> Before a clearance shall be granted for any *vessel* bound to a foreign place, the owners, shippers, or consignors of the cargo on board of such vessel, shall deliver to the collector manifests of the cargo, or the parts thereof shipped by them respectively, and shall verify the same by oath or affirmation; and such manifests shall specify the *kinds and quantities* of the articles shipped by them respectively, and the value of the total quantity of each kind of articles; and such oath or affirmation shall state that such manifest contains a full, just, and true account of all articles laden on board of such vessel by the owners, shippers, or consignors, respectively, and that the values of such articles are truly stated according to their actual cost, or the values which they truly bear at the port and time of exportation.

It will be observed that the above stringent clause does not extend to *railway-cars*, which in 1820 were unknown, and, consequently, unspecified in the act above referred to, nor to other land-vehicles, which have long been used in the transportation of merchandise across the Canadian border.

The defective character of these returns having long been known, the undersigned took occasion during the past summer to more thoroughly investigate the cause, with a view to its removal, personally visiting the

chief border-ports on both sides of the line, from Quebec to Chicago, consulting with our collectors and consuls, as well as with the Canadian authorities. Careful inquiry developed the fact that nearly all the produce and merchandise which are exported to Canada, of which full and correct returns are not made to this Bureau, cross the border at Saint Albans and Island Pond, in the customs-district of Vermont, and at Suspension Bridge, in the district of Niagara. The customs-officers at those places do all that is possible, under the present defective legislation, to obtain the kinds, quantities, and values of the articles transported in railway-carriages to ports in the provinces of Quebec and Ontario.

After consultation with the customs-authorities of Canada in Quebec and Montreal, and also with consuls of the United States, the undersigned proceeded to Ottawa, where he made arrangements with the Commissioner of Customs of the Dominion for an interchange of the detailed statements of imports, into each country from the other, for the past fiscal year, and for a similar interchange of quarterly statements in future. This interchange will prove advantageous to Canada as well as to this country, for the reason that Canadian statements of *exports* to the United States are far less than our returns of *imports* show them to be; for it is evident that the imports into each from the other are the more accurate, because the customs-officers of both countries are constantly on the alert to see that no dutiable merchandise crosses the border without paying its prescribed impost.

From the detailed statements by provinces and ports, as well as by articles and values, prepared by the commissioner of customs of the Dominion, the undersigned has been able to add to the stated value of articles embraced in the returns of collectors of customs of the districts of Vermont and Niagara the official figures obtained from Canada, which figures are published in the Statement of Domestic Exports, contained in the Annual Report of the Bureau, on Commerce and Navigation for the fiscal year 1874, and also in the Monthly Report for August, 1874.

The total value of the articles omitted as above-stated amounts, in the fiscal year 1874, to $10,200,059*, Canadian or specie values, and to $11,424,066 in United States currency, computed at the average premium on gold in that year.

The export of specie in the same period amounts to $3,619,568, as appears by the statements of this Bureau, while the Canadian imports show but $2,235,987; the former sum is, however, believed to be correct, the figures having been furnished by the agent of the express-company which conveyed the specie to Montreal, and verified by the undersigned.

In reciting the foregoing facts, the undersigned takes occasion to state that the fault does not wholly, or even chiefly, rest with the transportation-companies, whose principal officers, on the contrary, profess a willingness to aid the Bureau in the collection of full and accurate data in regard to our exports to Canada, but is due to the neglect of the shippers or consignors of merchandise to furnish full information as to the kinds, quantities, and values of the articles so shipped to Canada, and upon whom, it is hereby recommended, a penalty for such neglect should be imposed.

* While omissions of such magnitude are shown in our exports to Ontario and Quebec, it is instructive to notice that the published statements of the Bureau in regard to the exports to the maritime provinces of Nova Scotia and New Brunswick, nearly the whole of which are transported in vessels, substantially agree with those of the Dominion, thus confirming the statement that the omission of full returns is owing to defective legislation in regard to transportation by land-carriage.

The subject is respectfully submitted for your consideration, with the recommendation that it be brought to the attention of Congress for such legislation as may be deemed expedient and necessary; legislation which, while calculated to remedy the defect above indicated, will not place unnecessary obstructions to freedom of commercial intercourse.

OTHER DEFECTIVE LEGISLATION.

Among other defects in existing laws, which render it difficult to obtain full and accurate statistics, may be mentioned those under which it is sought to collect and publish information pertaining to the following subjects:

I. The coastwise movement of vessels of the United States.

II. The products of the fisheries taken by American vessels and fishermen and brought into the United States.

III. The immigration into and emigration from the United States.

I. *Coasting-trade.*—The published statistics of the coastwise navigation include only partial movements of vessels which may come within the provisions of the act of February 18, 1793, requiring entry or clearance to be made under certain circumstances; as, for instance, if the vessel has foreign goods on board above a certain value and under certain conditions, or enters from or clears for a port in another great coasting district. Since these movements comprise but a small portion of the trade from port to port in the United States, it will be readily seen that the statements published by the Bureau embrace but a small part of the coastwise tonnage-movement.

II. *Fisheries.*—With respect to products of the fisheries, taken by American vessels and fishermen, collectors are able to furnish official returns of the catch of those vessels only which, by the act of 1793, above mentioned, are required to make entry on their return from a fishing-voyage; as, for instance, vessels licensed for carrying on the fisheries returning from a voyage under a license to touch or trade at a foreign place. It is impossible, therefore, to obtain, under the present laws, accurate data in regard to the products of fish taken in the waters on our coast, which form the principal part of that important maritime industry.

The statements of this industry published by the Bureau are mainly collected in the few customs-districts from which returns are received by the personal efforts of the collectors, unaided by the requirements of law.

III. *Immigration and emigration.*—The statistics of immigration are derived from the manifests filed in the custom-houses of the country by masters of vessels, in pursuance of section 12, act of March 3, 1855. Since this provision of law is not construed to extend to cars and other land-vehicles, the same difficulty is experienced in regard to the immigration into the United States through the northern border-ports from Canada, and from Europe through Canada, as has already been indicated with respect to exports to Canada in railway-cars.

The importance of such legislation as will enable the Bureau to obtain, with greater accuracy, the details of this influx of persons of foreign birth, will appear, when it is stated that the immigration into the United States through the district of Huron alone exceeds that of any port in the United States except New York. By assiduous and earnest effort on the part of the Bureau, the officers of customs on the northern border have been induced to give to the subject their personal attention and have succeeded in obtaining, with approximate accuracy, the number of alien passengers who enter the United States in cars through their respective districts.

With regard to emigrants, or passengers departing from the United States, the only provision of law requiring lists of them to be filed with collectors is section 4, act of July 4, 1864, which has been construed to extend only to American vessels. Hence, information in relation to passengers or emigrants departing by cars or foreign vessels can only be obtained through the personal efforts of the collectors of the various ports, unaided by law. As the number of emigrants from the United States has of late largely increased, taking passage, as they do, chiefly in foreign steamships, the efforts to obtain, with approximate accuracy, the number of departures have been attended with great difficulty.

The foregoing defects in legislation are also submitted for the consideration and action of Congress. The importance of being able to obtain and publish accurate statements on the above subjects induces a hope that Congress will, at an early day, give them such attention as will result in providing effectual remedies for the important defects above indicated.

DESTINATION OF EXPORTS.

It may not be improper in this connection to refer to the difficulties, not arising from defective legislation, of obtaining with accuracy the ultimate destination or foreign market of all domestic produce exported from the United States.

Although the eleventh section of the act of February 10, 1820, before cited, explicitly requires that "the master and the owners, shippers, and consignors of the cargo shall state, upon oath or affirmation, to the collector the foreign port or country in which such cargo is *truly intended to be landed*," it is found to be impracticable to enforce this law in all cases. These difficulties, therefore, cannot be said to arise from defective legislation, but rather from various causes, among which are the exigencies of our growing commerce and the innovations upon the ancient courses of trade made by ocean steam transportation and the daily knowledge of the state of distant foreign markets afforded by the submarine and other telegraphs.

In many cases, the exporter clears his vessel and goods for some convenient port, accessible or in the direct route to several markets. The vessel is met on her arrival with orders by telegraph, or otherwise, to proceed to the market deemed most advantageous for the sale of her cargo.

Many vessels are reported from the principal ports as cleared for Queenstown and Gibraltar "for orders," and no other destination of the goods being known at the time of the clearance they are necessarily returned and appear in the printed reports of the Bureau as exports to Ireland and to Gibraltar, respectively.

Large amounts of breadstuffs, cotton, and petroleum thus appear as exports to countries in which they are never landed.

The following are the totals of domestic exports to Ireland and to Gibraltar during the fiscal year ended June 30, 1874, and the principal articles exported to those places:

To Ireland—1874.	Value.	To Gibraltar—1874.	Value.
Total value	$43,569,655	Total value	$2,519,883
Principal articles:		Principal articles:	
Indian corn	10,667,907	Illuminating-oil	1,438,472
Wheat	25,903,529	Spirits	60,724
Wheat-flour	285,244	Tobacco, and manufactures of	809,070
Cotton, unmanufactured	3,855,303		

It also appears that, during the year ended June 30, 1871, there were exported from the United States to Belgium, 17,384,603 gallons of refined petroleum, valued at $4,295,037. The published trade statements of Belgium for the year 1871 (a period six months later) give the imports for consumption into that country from all foreign countries as 13,618,000 kilogrammes of "oil other than for table-use," valued at 14,980,000 francs, or 4,289,000 gallons,* 2,996,000 dollars, (United States measure and value,) which, from the high price per gallon, would appear to include a considerable amount of oil other than petroleum. As the population of Belgium in 1872 was but a little over five millions, (5,021,336,) the country abounding in coal, which is mined far in excess of consumption and thus affording cheap illuminating material, it would appear that the bulk of the petroleum exported from this country to Belgium is merely transhipped at Antwerp, and forwarded to the interior markets of the Continent.

These exports would appear to be largely in excess of the demand of the markets of the countries specified, especially those to Gibraltar.

The difference between the declared exports to certain countries and those reported as received into those countries is more clearly exemplified by the following statement:

Table showing the quantity of Indian corn and petroleum exported from the United States to Ireland, taken from the United States accounts, as compared with the imports of the same articles into the principal ports of Ireland from all countries, taken from the British Trade Reports for the periods specified.

Articles.	Unit of quantity.	Imported at the principal ports of Ireland from all foreign countries during the two years ended June 30, 1873.	Exported from the United States to Ireland during the two years ended June 30, 1873.
Indian corn	Bushels	23,877,766	27,105,930
Petroleum	Gallons	1,877,474	13,961,768

The peculiarities pointed out with reference to the destination of our exports from oceanic ports obtain in a more marked degree with respect to our domestic products which seek the markets of Europe through the Canadian Provinces on our northern border. To investigate this subject more fully the undersigned visited Chicago and made particular inquiries, not only of the officers of customs and the secretary of the board of trade, but of the principal shippers, and ascertained that the grain and flour as well as a large part of the provisions which the returns from the custom-house of that port indicate were shipped to the Provinces of Ontario and Quebec were really purchased on Canadian account and shipped in great part to Montreal. The names of consignees in the last-named city were obtained with a view of instituting further inquiries in regard to the ultimate destination of the breadstuffs. In the further prosecution of this inquiry the fact has been established that nearly the whole of the Indian corn, or maize, and flour and the greater part of the grain shipped from the upper lake-ports, which are returned to and published by this Bureau as exports to the provinces of Ontario and Quebec, find a market in Europe, while

* The gallon of petroleum is computed at seven pounds.

a part of the grain is first manufactured into flour, in which state it reaches the same destination.

The following table will illustrate the facts above stated:

Statement of domestic breadstuffs exported from the ports of Chicago, Ill., Detroit, Mich, Milwaukee, Wis., Port Huron, Mich., and Toledo, Ohio, to the provinces of Quebec and Ontario, Dominion of Canada, during the fiscal year ended June 30, 1874.

Articles.	Chicago, Ill.		Detroit, Mich.		Milwaukee, Wis.

Articles.	Port Huron, Mich.		Toledo, Ohio.		Totals.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Indian corn .....bushels..	329, 403	$179, 673	1, 458, 867	$756, 951	5, 122, 819	$2, 599, 974
Wheat .....do....	99, 366	134, 258	478, 175	631, 296	8, 477, 804	10, 241, 019
Wheat-flour .....barrels..	48, 405	372, 622	.....	.....	82, 316	570, 587
Other breadstuffs.....	.....	42, 716	.....	.....	.....	267, 510
Total value	.....	729, 269	.....	1, 388, 247	.....	13, 679, 090

Out of 7,418,711 bushels of Indian corn, or maize, exported to the provinces of Quebec, Ontario, and Manitoba for the fiscal year ended June 30, 1873, 7,366,727 bushels were exported from the ports of Chicago, Detroit, Toledo and Port Huron, to the provinces named. It also appears from the Canadian statistical reports that during this period there were exported from the Dominion of Canada to foreign countries 6,242,976 bushels of Indian corn, *not the produce of the Dominion;* hence it is fair to presume that it was the produce of the United States. As only 226 bushels of Indian corn were imported into the United States from the Dominion during the year, it would appear that but little if any of the large amount exported by the route indicated, was re-imported into the country or went into consumption in Canada, but that it was transported to transatlantic markets. That this corn was shipped to foreign markets via the Saint Lawrence River is indicated by the fact that if it were transported from Canada across our territory and shipped to foreign countries from the ports of Portland, Boston, or New York, it would appear in our account of the In-transit Trade, but that account for the year under consideration fails to show that any Indian corn was received from Canada in transit for foreign countries.

So far as the published statements of the Bureau show the volume and value of domestic exports, they are as accurate as the existing laws under which they are compiled will admit, but for the reasons just given they do not contain that information which would be desired in any critical examination, with a view to trace the course of trade or determine the foreign markets in which our domestic products enter into consumption.

It would be interesting to know with accuracy what foreign countries absorb the vast volume of our domestic products, and the lack of this information is much to be regretted.

The published statements of commercial statistics lose half their value if they do not enable the inquirer to trace commodities from their places of production to the places of their consumption. It is hoped that such inquiries may be facilitated by inducing foreign countries to keep accurate accounts of the producing countries of the commodities entering into consumption in their various markets, as is now attempted to be done by this Bureau with respect to commodities imported from foreign countries.

STATISTICS OF LABOR.

In the report of the Chief of the Bureau made to your predecessor last year, the fact was mentioned that he had devoted much time and money, when in Europe, in 1872, to the investigation of the cost and condition of labor in those branches and in those countries which compete with similar industries in the United States, but that, owing to the pressure of official duties and health impaired thereby, he had made but little progress in the compilation of a special report thereon.

During the past year, however, the data thus personally collected, supplemented by information which he has more recently obtained, in regard to the rates of wages and the cost of living in the principal countries of Europe, have been, in large part, prepared for the press, and will be completed before the close of the ensuing session of Congress. His inquiries are now directed to the collection of facts in reference to labor and the cost of subsistence in the United States and the neighboring British Provinces, with a view to comparison with similar data already obtained from the Old World.

IMPORTS AND EXPORTS.

Detailed statements of imports into and of domestic and foreign exports from the United States during the fiscal year 1874, as compared with 1873, in which the increase and decrease are, respectively, indicated, are appended to this report, (marked B.)

PRICES OF STAPLE ARTICLES.

A statement showing the prices of staple articles in the New York market at the beginning of each month, in the calendar year 1874, is appended to this report, (marked C.)

Very respectfully, yours,

EDWARD YOUNG,
Chief of Bureau.

Hon. BENJAMIN H. BRISTOW,
Secretary of the Treasury.

Aggregate in 1874	31, 923	4, 595, 883. 72
Aggregate in 1873	31, 684	4, 468, 046. 81
Increase in 1874 over 1873	239	127, 836. 91

* Previous to the passage of the act of April 18, 1874, canal and other boats employed on inland waters or canals were required to be enrolled and licensed under the provisions of the act of February 18, 1793, if they entered navigable waters, and, from the fact of such enrollment and license, were included in the returns of tonnage belonging to the several districts of the United States June 30, 1873. The act of April 18, 1874, exempts this class of boats, with but few exceptions, from enrollment and license, and hence they do not appear in the returns of tonnage belonging to the several customs-districts June 30, 1874. The difference between the tonnage of unrigged vessels reported June 30, 1873, and that reported June 30, 1874, is assumed to be the amount dropped in consequence of the passage of the last-named act.

APPENDIX B.

Comparative statement of Imports for the fiscal years ended June 30, 1874 and 1873.

There were built	62	16	72	2	13	1	2	107,947.18
There were wrecked, foreign vessels, documented	1	2	2	.....	1	.....	.....	1,678.96
To this amount, on account of corrections of balances	.....	.....	.....	.....	.....	.....	.....	2,058.50
								111,684.64
There were sold to foreigners	77	5	16	2	8	.....	.....	73,214.95
There were abandoned as unfit for service	8	1	.....	.....	2	.....	.....	5,116.85
There were lost at sea and wrecked	24	15	27	1	9	.....	.....	27,717.91
Balance in favor of increased registered tonnage	.....	.....	.....	.....	.....	.....	.....	5,634.93
Total	.....	.....	.....	.....	.....	.....	.....	111,684.64
The increase of tonnage, as compared with 1873, appears to be								104,625.61
Total								104,625.61

	ENROLLED AND LICENSED VESSELS.							
	Ships and barks.	Brigs and brigantines.	Schooners.	Sloops.	Steamers.	Barges.	Canal-boats.	Enrolled and licensed tonnage.
There were built	9	6	583	211	391	308	471	324,777.99
There were wrecked, foreign vessels, documented	.....	.....	3	1	.....	.....	.....	207.88
To this amount, on account of corrections of balances	.....	.....	.....	.....	.....	.....	.....	961.76
								325,947.63
There were sold to foreigners	.....	.....	14	1	6	1	2	3,838.90
There were abandoned as unfit for service	.....	.....	59	42	101	34	27	28,641.35
There were lost at sea and wrecked	2	5	239	24	70	36	21	58,390.86
To this amount, on account of correction of balances and canal-boats dropped as exempt	.....	.....	.....	.....	.....	.....	.....	136,085.84
Balance in favor of increased enrolled and licensed tonnage	.....	.....	.....	.....	.....	.....	.....	98,990.68
Total	.....	.....	.....	.....	.....	.....	.....	325,947.63
The increased registered tonnage brought down								5,634.93
The increased enrolled tonnage brought down								96,231.80
The increased licensed tonnage (under 20 tons) brought down								2,758.88
Total								104,625.61

No. 19.—*Recapitulation of the Tonnage of the United States on the 30th of June*, 1874.

	Tons.	
REGISTERED VESSELS.		
Registered vessels employed in the foreign trade on the 30th of June, 1874	.....	1, 428, 923. 18
ENROLLED AND LICENSED VESSELS.		
Enrolled vessels employed in the coasting-trade on the 30th of June, 1874	3, 243, 656. 83	
Licensed vessels under 20 tons employed in the coasting-trade on the 30th of June, 1874	49, 782. 30	3, 293, 439. 13
FISHING-VESSELS.		
Enrolled and licensed vessels employed in the cod and mackerel fisheries on the 30th of June, 1874	68, 489. 62	
Licensed vessels under 20 tons employed in the cod and mackerel fisheries on the 30th of June, 1874	9, 800. 39	78, 290 01
Total	.....	4, 800, 652. 32
The registered tonnage employed in the whale-fisheries on the 30th of June, 1874	39, 107. 80	
The registered tonnage employed in other than the whale-fisheries on the 30th of June, 1874	1, 389, 815. 38	1, 428, 923. 18
The registered tonnage employed in steam-navigation on the 30th of June, 1874	195, 245. 06	
The enrolled and the licensed tonnage employed in steam-navigation on the 30th of June, 1874	990, 364. 68	
Total steam-tonnage	.....	1, 185, 609. 74

No. 20.—*Description of Tonnage.*

	Tons.	
The aggregate amount of the tonnage of the United States on the 30th day of June, 1874, was	.....	4, 800, 652. 32
Whereof, permanent registered tonnage	1, 052, 186. 62	
temporary registered tonnage	376, 736. 56	
Total registered tonnage	.....	1, 428, 923. 18
permanent enrolled tonnage	3, 167, 277. 22	
temporary enrolled tonnage	144, 869. 23	
Total enrolled tonnage	.....	3, 312, 146. 45
licensed tonnage under 20 tons employed in the coasting-trade	49, 782. 30	
licensed tonnage under 20 tons employed in the mackerel-fisheries	9, 800. 39	
Total licensed tonnage under 20 tons	.....	59, 582. 69
		4, 800, 652. 32
Of the enrolled and licensed tonnage, there were employed in the—		
Coasting-trade	3, 243, 656. 83	
Cod and mackerel fisheries	68, 489. 62	3, 312, 146. 45
Of the registered tonnage, amounting to	1, 428, 923. 18	
There were employed in steam-navigation	.....	195, 245. 06
Of the enrolled and licensed tonnage, amounting to	3, 371, 729. 14	
There were employed in steam-navigation	.....	990, 364. 68
Total steam-navigation	.....	1, 185, 609. 74
